

**DURING A COLD NEW ENGLAND WINTER, POWER TO THE PEOPLE TAKES ON A WHOLE NEW MEANING.**

At Bemis, we understand that power is vital to your customers' lives and livelihoods. We have been maintaining and upgrading the Northeast's electrical infrastructure for more than 30 years. With an experienced team and state-of-the-art equipment, we navigate any terrain to build electric transmission and distribution systems along the region's roads and wooded right-of-ways. Wherever towers, poles and lines are needed, Bemis delivers.

Our promise is to bring your customers the power they need, where and when they need it. We understand today's need for reliable energy and are committed to providing it in the most effective and environmentally conscious way.

**Bemis Transmission and Distribution Services:**

- Electrical distribution construction services, including all aspects of overhead and underground facilities from the substation exit riser to the customer meter pan

- Steel pole and tower maintenance and inspection
- Complete manhole, duct and cable installation, including splicing and termination
- Live line services; experienced at all operating voltages
- Installation of all types of high voltage cable systems, including cable and pipe installations
- Complete system reliability reviews and integrated enhancement programs
- System voltage conversions and reinforcements
- Transmission and distribution system infrared line inspections
- Substation construction and maintenance
- Storm emergency system restoration
- Rock drilling and directional boring capabilities

**Bemis Environmental Matting Services:**

- Environmental and road matting, specializing in timber, laminate, durabase, right-of-way access, road aprons and platforms

YOUR CUSTOMERS RELY ON YOU—AND YOU CAN RELY ON US. FOR MORE THAN 30 YEARS WE'VE BEEN MAINTAINING AND UPGRADING THE POWER SYSTEMS THAT ARE VITAL TO YOUR CUSTOMERS LIVES.

(Services, continued)

### **Bemis Example Line Projects:**

- 8.4 miles of reconducted 46kV transmission line for a large investor-owned utility in Mount Holly, Vermont.
- Relocation of 69kV line and a 46kV line for a large investor-owned utility in Bennington, Vermont.
- 5.5 miles of reconducted distribution line for a electric utility in Dover, Vermont.
- Built three separate line extensions for State Police Radio Towers in Massachusetts which included mostly off-road equipment and drilling.

### **Bemis Example Matting Projects:**

- Provided matting and environmental controls for more than 15 months on the Edic-New Scotland project in New York for a large utility customer.
- Provided matting and environmental controls for two large projects in Massachusetts for a large utility. Projects included a 230kV line re-build which required building work platforms as well as roadways into remote structures.

### **ENERGY SOLUTIONS YOU CAN RELY ON**

Infrastrux Group is a premier national provider of electric power and natural gas transmission and distribution maintenance and construction solutions. By combining a shared strategy with decentralized execution, Infrastrux enables each company to benefit from the greater resources of the group while maintaining a commitment to local concerns and customer requirements. Our services range from turn-key solutions to highly specialized projects, each performed with careful attention to the highest-quality safety standards.
